

GSM Repeater/Signal Amplifiers for Small Office

Our GSM Repeaters / Signal Amplifiers are ideal solutions in over coming poor indoor GSM reception. It works by rebroadcasting strong outside GSM signals inside the building, providing significantly improved GSM reception indoor.

Our GSM Repeater unit is small and compact usually supplied with an outdoor antenna with 10 meters coax cable + and an indoor antenna, and is suitable for DIY installation.

We offer a choice of Repeater Units, Antennas and Cable options to better meet your needs.
